About Alma

When Alma Tavares was 5, she was suddenly diagnosed in February 2023 with Acute Lymphoblastic Leukemia (ALL) Cancer, and she had to go through 2 years of extreme chemo treatments.

Alma was a very happy and active child – in particular, she liked to dance, play with her cousins and friends, enjoyed playing the piano and loved to travel to Dominican Republic. Unfortunately, after Alma was diagnosed everything changed and she spent a lot of her time in the hospital. The typical chemo made her very sick and the doctors had to change her regular three-week treatment to a weekly “ Reily” leg injection treatment. Alma hated these injections, but she dealt with them better than I ever could imagine.

On March 13th, 2025, after two long years of a lot of emergency room visits, doctor appointments, chemo and other medication, Alma finally completed her last chemo treatment and rang the bell. This was one of the most happiest day in all of our lives.

Alma is currently in remission for several months and she is returning back to her usual self and doing everything she enjoyed before being diagnosed with Acute Lymphoblastic Leukemia (ALL) Cancer.

Acerca de Alma

Cuando Alma Tavares tenía 5 años de edad, repentinamente le diagnosticaron cáncer de Leucemia Linfoblástica Aguda (ALL), en Febrero del 2023 y tuvo que pasar por 2 años de tratamientos de quimioterapia extremos.

Alma era una niña muy feliz y activa, en particular, le gustaba bailar, jugar con sus primos y amigos, disfrutaba tocando el piano y le encantaba viajar a República Dominicana. Desafortunadamente, después de que Alma fue diagnosticada, todo cambió y pasó gran parte de su tiempo en el hospital. La quimioterapia típica la enfermó gravemente y los médicos tuvieron que cambiar su tratamiento regular de tres semanas por un tratamiento semanal de inyección en la pierna "Reily". Alma odiaba esas inyecciones, pero las manejó mejor de lo que yo podría imaginar.

El 13 de marzo de 2025, después de dos largos años de muchas visitas a la sala de emergencias, citas con el médico, quimioterapia y otros medicamentos, Alma finalmente completó su último tratamiento de quimioterapia y tocó la campana. Este fue uno de los días más felices de todas nuestras vidas.

Alma se encuentra actualmente en remisión durante varios meses y está volviendo a ser la misma y a hacer todo lo que disfrutaba antes de ser diagnosticada con cáncer de Leucemia Linfoblástica Aguda (ALL).
